Why are you excited to be part of the LMPCA Executive Council leadership team?

Historically our healthcare system more or less is designed to work in silos with intermittent communication with one another when deemed necessary. The more experience I gain in primary care the more clear it becomes to me that open channels and collaboration is key for strong and united primary care and most importantly excellent patient care. I am very excited to break out of my silo to collaborate with other organizations within our communities to increase access and quality of care.

If you were part of the LMPCA Executive Council, what would be one issue you would like to champion? Why? How will you ensure that you will represent the interests of the entire primary care sector?

One interest would be to work on equitable access to care for our patients; considering social determinants of health. I believe this council can impact the care of our patients from all levels - micro, meso and macro. Why? I see the gaps and I want to be apart of the change to address them. I find when I pick up the phone to collaborate with community organizations/HCPs the better the outcome is for our those who we serve, in essence I see the value of all in primary care and will represent all

Do you have expertise in an area that you think would be valuable for the LMPCA?

- Expertise in improving access to care for our patient population
- Active role in initiating and establishing our FHT's Health Equity and Cultural Safety Committee

Do you have any potential conflicts of interest / current leadership roles that may impact by being involved with the LMPCA Executive Council?

none
